JASON CARR

ANALYTICS & ENGINEERING

PROFESSIONAL SUMMARY

Master's student in Electrical and Computer Engineering and optoelectronics professional with 5 years of laboratory experience. Demonstrated expertise in achieving novel scientific results and driving efficiency in team-based environments. Seeking a position on a competitive team where I can grow as an analyst/engineer and leader while leveraging past experience. Strong problem-solving skills and a proven track record of leadership.

EMPLOYMENT HISTORY

JUN, 2026 - PRESENT

Service Technician, Fine Fabric Care

Performs inspection, cleaning, and restoration work in accordance with IICRC standards, including but not limited to emergency fire and water damage restoration, hard and soft flooring treatments and cleanings, HVAC and general ducting repair and cleaning, and upholstery restoration and cleaning. Conducts customer-facing price estimations, surveys of the jobsite, process explanations, mechanical systems repair and maintenance, and chemical testing. Works independently, cooperatively, and in supervisory roles as determined by the requirements of the job. Actively reducing the average time for job-completion across the team, while increasing customer satisfaction.

MAR, 2023 - PRESENT

Miscellaneous Work Experience

Assisting in the teaching and outreach, as well as social media content and web development, for Butte Tango — focusing on growth and retention metrics.

Performed sales, technical support, and customer service-related duties as a Mobile Expert with T-Mobile; achieved #2 in sales metrics in the Mountain West region, while also maintaining a customer satisfaction rating in the 98th percentile. Simplified complex account states to optimize value, ease of use, and clarity.

Navigated the local Butte, Elk Park, and Rocker area as a Seasonal Support Driver with UPS. Planned efficient routes based upon delivery time requirements, vehicle packing order, and weather. Maintained a nearly 100% delivery success rate.

NOV, 2021 - FEB, 2023

Team Lead, NocturnalGG

Identified and recruited potential new team members to enhance the capabilities and competitiveness of the Halo Championship Series Esports Team under NocturnalGG. Led daily team meetings to discuss team strategies, analyze competitors, and identify areas for improvement for team members. Collaborated with the management team to develop and execute a long-term growth plan for the organization, including expanding into new markets and diversifying revenue streams. Represented the organization in industry events to establish and maintain relationships with potential sponsors and partners. Provided regular feedback and performance critiques to team members to support their growth and development as players based on data analysis. Implemented training and development programs to enhance the skills and performance of the team members.

Facilitated cross-functional collaboration between team members, tournament organizers, sponsors, and management to ensure effective communication and alignment of goals and strategies. Coordinated and participated in practice sessions and scrimmages to improve team cohesion and gameplay strategies. Identified and resolved conflicts and disagreements within the team to maintain a positive and cohesive team dynamic. Created and managed team schedules to ensure optimal practice time and player availability regarding competitor teams and tournaments. Ranked in the 98th percentile in the world for competitors within the Halo Championship Series, and featured in official promotions for brands including Microsoft and Dolby. Improved the average placing of the team by over 400 percent.

JAN, 2017 - AUG, 2021

Laboratory Researcher, Cone-Thiel Spectroscopy Laboratory

Collaborated with industry partners to identify and implement innovative solutions in quantum information science, crystalline growth, and optoelectronics research. Implemented safety protocols and ensured compliance with laboratory regulations and standards, including proper handling and disposal of hazardous materials. Developed and maintained standard operating procedures for laboratory equipment and processes to ensure reproducibility and accuracy of experimental results.

Managed and maintained laboratory equipment, including regular maintenance, calibration, and repair tasks, to ensure optimal functionality and minimize downtime. Collaborated with researchers from other disciplines to explore interdisciplinary research opportunities and cross-pollination of ideas. Contributed to the development of new experimental techniques and methodologies in the field of quantum information science. Developed and implemented protocols for crystal growth experiments. Collected, analyzed, and formatted experimental data. Presented results at conferences and weekly meetings. Assisted in the development of research proposals to secure funding for laboratory projects and equipment. Conducted literature reviews to stay updated on the latest advancements in quantum information science research and identify potential areas for further exploration and experimentation. Optimized laboratory procedures and workflows to increase efficiency and productivity.

EDUCATION

MAY 2024 - CURRENT

Master of Science, University of Colorado Boulder

Electrical and Computer Engineering [Transcript available upon request]

AUG, 2015 - MAR, 2019

Bachelor of Science, Montana State University

Professional Physics, Minor in Mathematics

SKILLS

- POWER ELECTRONICS ANALYSIS & DESIGN
- TECHNICAL WRITING
- DATABASE MANAGEMENT
- PYTHON
- DATA COLLECTION
- DATA ANALYSIS
- DATA VISUALIZATION
- MATLAB
- MICROSOFT OFFICE
- THIN-FILM DEPOSITION
- CRYO-VACUUM SYSTEMS
- CW LASER OPERATION
